

ASSIGNMENT NO.3: Conditional Queries and Data Filtering

Question:-

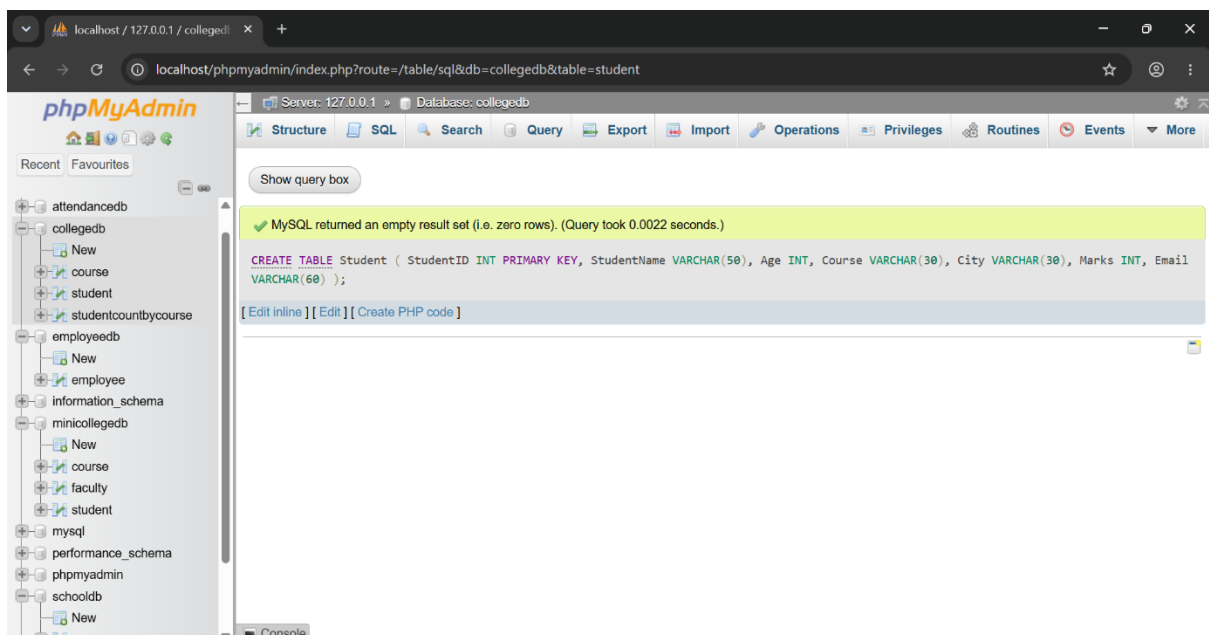

Q1) Create a database named CollegeDB and a table named Student.

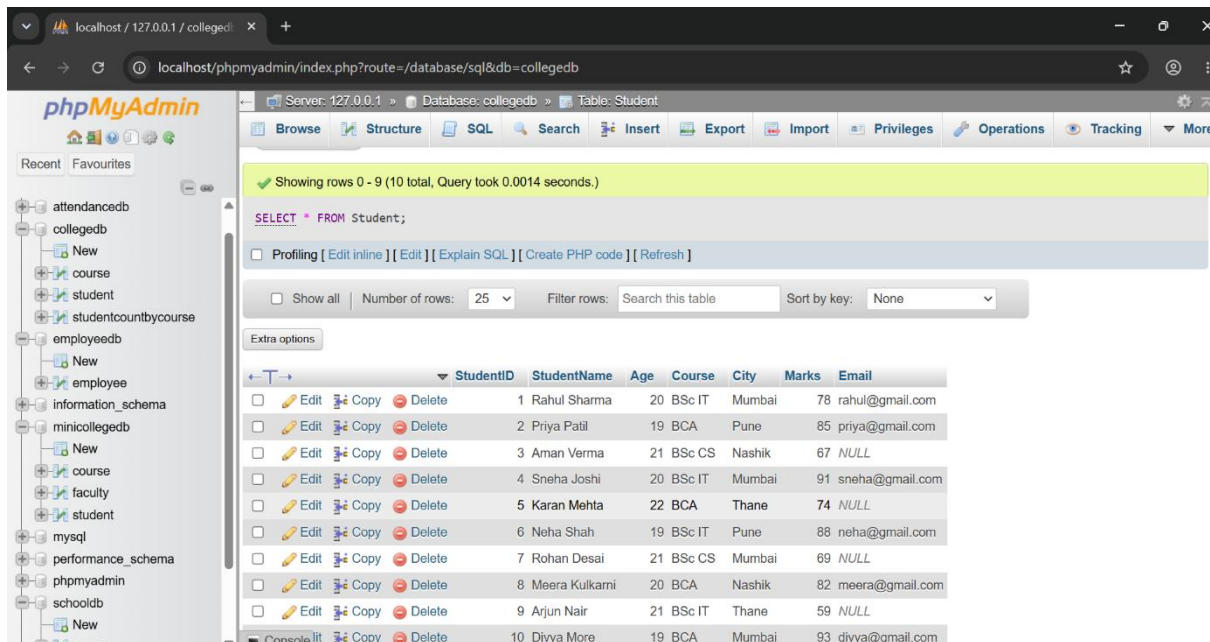

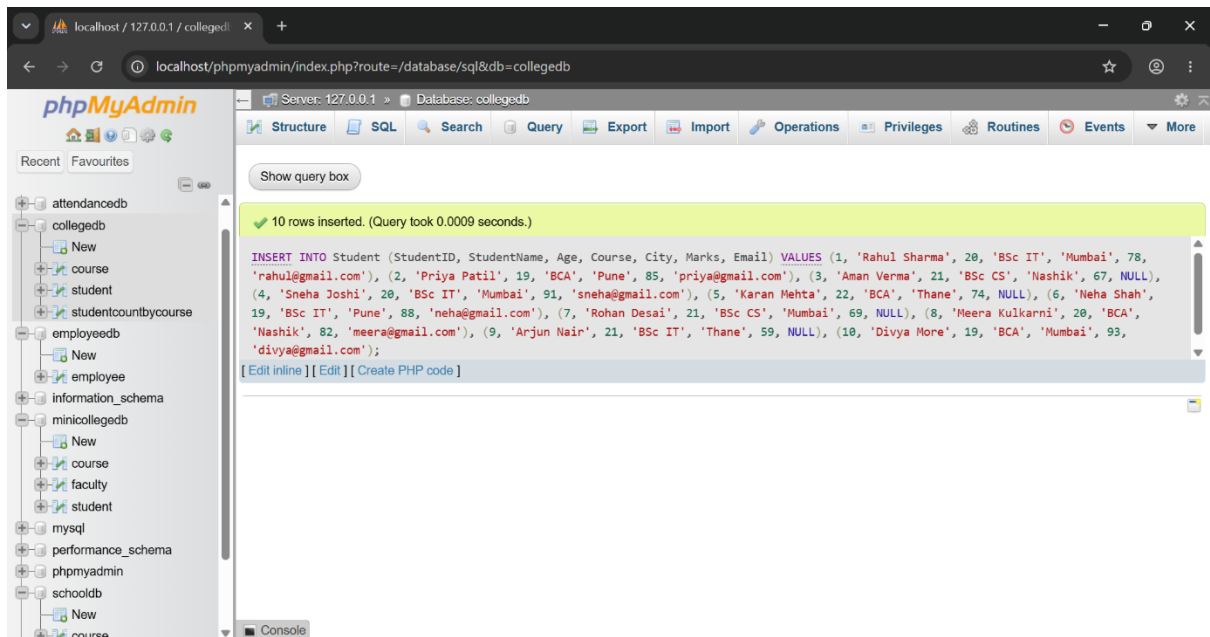

The table should contain the following columns:

Column Name	Data Type	Constraint
StudentID	INT	PRIMARY KEY
StudentName	VARCHAR(50)	
Age	INT	
Course	VARCHAR(30)	
City	VARCHAR(30)	
Marks	INT	
Email	VARCHAR(60)	

Insert at least 10 records into the table. Some records should contain NULL values in the Email column.

Answer:-

Q2) Write a MySQL query to display students who are from Mumbai and have marks greater than 80.

The output should include:

Column
StudentID
StudentName
City
Marks

Answer:-

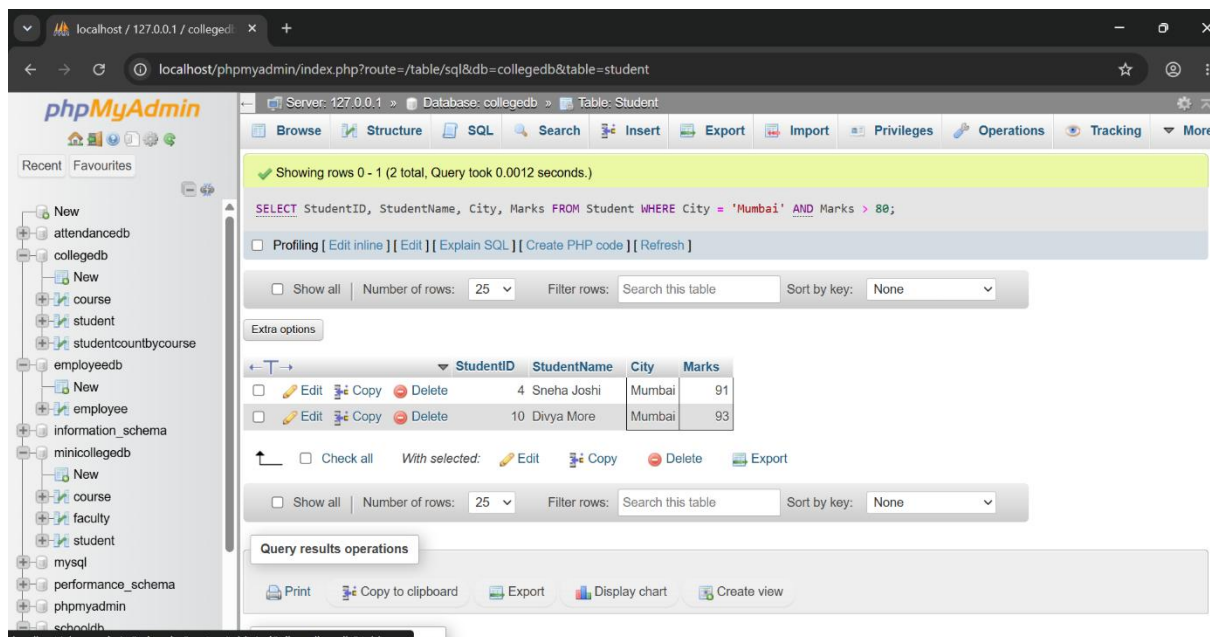

MySQL query:-

SELECT StudentID, StudentName, City, Marks

FROM Student

WHERE City = 'Mumbai'

AND Marks > 80;

Q3) Write a MySQL query to display students who belong to either Pune or Nashik.

Use the OR operator and display the following columns:

Column
StudentName
Course
City

Answer:-

SELECT StudentName, Course, City

FROM Student

WHERE City = 'Pune'

OR City = 'Nashik';

The screenshot shows the phpMyAdmin interface for the 'collegedb' database. The 'Student' table is selected. The SQL query entered is: `SELECT StudentName, Course, City FROM Student WHERE City = 'Pune' OR City = 'Nashik';`. The results show 3 rows:

StudentName	Course	City
Priya Patil	BCA	Pune
Aman Verma	BSc CS	Nashik
Neha Shah	BSc IT	Pune

Q4) Write a MySQL query to display students whose marks are between 70 and 90. Use the BETWEEN operator and display:

Column
StudentName
Marks

Answer:-

SELECT StudentName, Marks

FROM Student

WHERE Marks BETWEEN 70 AND 90;

The screenshot shows the phpMyAdmin interface for the 'collegedb' database. The 'Student' table is selected. The SQL query entered is: `SELECT StudentName, Marks FROM Student WHERE Marks BETWEEN 70 AND 90;`. The results show 5 rows:

StudentName	Marks
Rahul Sharma	78
Priya Patil	85
Karan Mehta	74
Neha Shah	88
Meera Kulkarni	82

Q5) Write a MySQL query to display students whose names start with the letter A. Use the LIKE operator and display:

Column
StudentID
StudentName

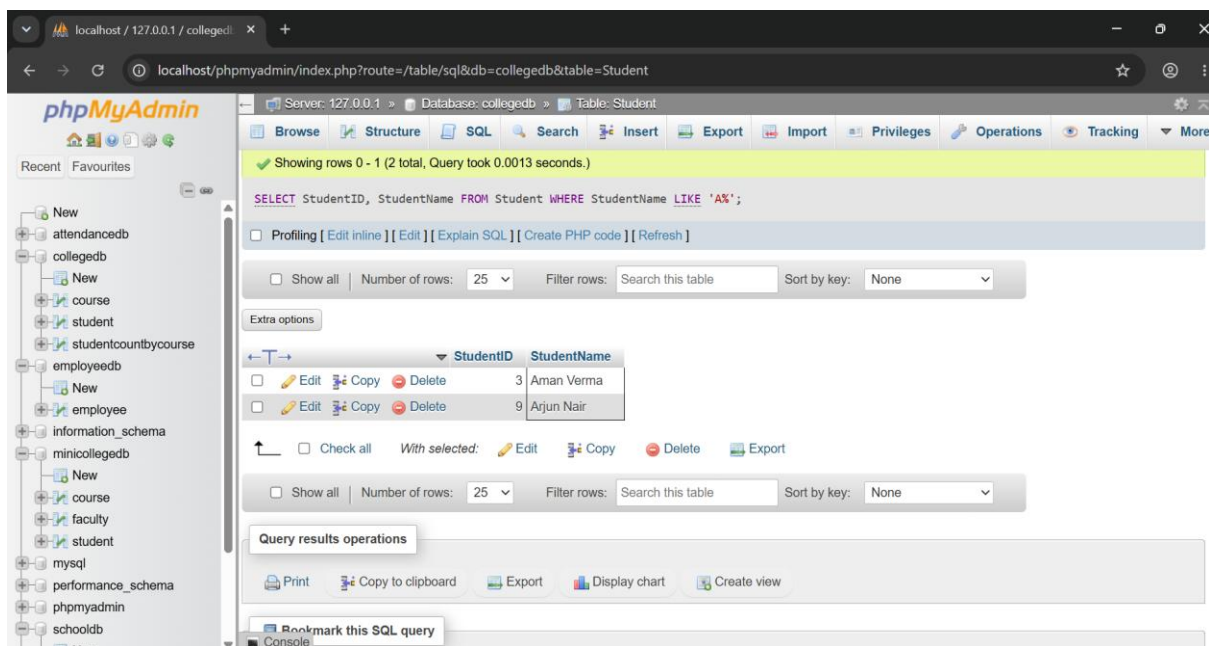

Answer:-

MySQL query:-

SELECT StudentID, StudentName

FROM Student

WHERE StudentName LIKE 'A%';

Q6) Write a MySQL query to display students whose email address is missing. Use the IS NULL operator and display:

Column
StudentID
StudentName
Email

Answer:-

MySQL query:-

SELECT StudentID, StudentName, Email

FROM Student

WHERE Email IS NULL;

The screenshot shows the phpMyAdmin interface in a web browser. The browser address bar displays `localhost/phpmyadmin/index.php?route=/table/sql&db=collegedb&table=Student`. The interface shows the 'collegedb' database selected, with the 'Student' table chosen. The SQL query `SELECT StudentID, StudentName, Email FROM Student WHERE Email IS NULL;` is entered in the SQL tab. The results show 4 rows where the email is NULL.

Showing rows 0 - 3 (4 total, Query took 0.0031 seconds.)

```
SELECT StudentID, StudentName, Email FROM Student WHERE Email IS NULL;
```

Number of rows: 25 Filter rows: Search this table Sort by key: None

StudentID	StudentName	Email
3	Aman Verma	NULL
5	Karan Mehta	NULL
7	Rohan Desai	NULL
9	Arjun Nair	NULL

Query results operations
